Our roadmap for space

Dr Kimberley Clayfield, Space Technology Future Science Platform Leader

7th SA Space Forum – 9 May 2019
CSIRO Space Technology FSP

- Advanced technologies for Earth observation
- Resource utilisation in space
- Manufacturing and robotics for space missions
- Technologies for satellite communications and services
- Space object tracking
- Life support in space

Space Technology will identify and develop the science to leapfrog traditional technologies and find new areas for Australian industry to work in, bringing economic returns and improving the lives of Australians.
Thank you

Space Technology Future Science Platform
